PETIC GLOBAL

COMPANY PROFILE

PEITC GLOBAL

ABOUT US

Sheik Salah has been in worldwide business, establishing various companies in the Middle-East and Africa, providing quality construction projects and engineering services, in the sector of oil & gas. At the beginning, the Petic group invested heavily in the Gulf States and Tanzania, by building infrastructure and road projects, and then the group next phase moved in to Manufacture household and pharmaceutical products in Rwanda, and gas cylinders in Uganda.

The Group now is planning to represent Chinese Car manufacturers, by creating assembling workshop in Africa.

TANZANIA INVESTMENT

East Trading & Manufacturing Company LTD
 Kisutu Stree 2423
 Dar Es Salaam.
 Tanzania

East trading & manufacturing company has been set up in Tanzania to provide quality construction services to real estate contractors, construction companies, and civil engineering and infrastructure industries. The company established a successful track record through commitments to its customers within the operations and construction domain.

After getting high experiences in the building services, the East Trading company is moving forward to undertake complex and challenging civil engineering and building projects, extending its services from innovative technical concepts and front end engineering designs to achieve a long term goals in the construction management and undertaking many projects in the constructions sector including installation, commissioning and long-term operation maintenance. The rapid growth of East Trading and manufacturing company is driven by its bold vision, strong entrepreneurial spirit, and devotion to customer satisfaction, delivering excellent quality product services. The Eastern Trading and manufacturing company holds a portfolio of strategic investments in the construction sectors; owning substantial fleet of mobile plants in the Gulf States and East Africa region. This Compliments the company's multi-domestic growth strategy whic focuses its operating hubs in both regions

OUR MISSION

Our mission statement is to participate and contribute to the development, enrichment of services in the Gulf States and East Africa region, offering to various community solutions in the sector of construction, providing high quality engineering services. The company is fully committed to look after the interest of its customers, employees, shareholders and communities. The Group conduct its business ethically and profitably as responsible corporate citizens.

To accomplish our mission, it continually:

- o Enhance its competence using powerful qualified engineering minds, enabling a good communication at all levels to improve the operating environment.
- o Expanding its presence in existing markets through fair pricing, respecting deadlines, providing quality products and good value solutions, and offering high quality services by using advanced and creative technological approaches and support solutions with continuous improvements of its operating systems.
- o Energize its employees by continuously promoting a culture that recognizes performance, valuable contributions and celebrating successes.

CHASE THE VISION,
NOT THE MONEY,
THE MONEY
WILL END UP
FOLLOWING YOU.

OUR ACTIVITIES

East Trading & its main Group Petic Global International projects and construction management services include:

Early involvement during the feasibility and design development stages securing value engineering alternatives and full scrutiny of constructability issues. Planning and coordination of construction activities and designs are deliverables in time to secure uninterrupted construction activities.

OUR SPECIALTIES

PROJECTS & CONSTRUCTION

The East Trading & its main Group Petic Global philosophy can be put into one simple formula - can do! That is a promise we have been fulfilling over and over and that will remain the highest factor guiding our actions in future. We continually strive to improve our performance and to complete the Projects within the scheduled time, while maintaining standards of quality and safety during the execution

RELIABILITY

Every Facet of our comprehensive spectrum of service is governed by a high quality standard which make East Trading and Its Main group as a successful enterprise. The Group bring this standard to life on a daily basis by applying quality management, excellent safety practices and last but not least the customer-oriented synergy effects arising from our partnership

OUR ACTIVITIES

1- CIVIL WORKS AND CONSTRUCTION

East Trading & manufacturing Company holds a portfolio of strategic investment in construction equipment; Property and a substantial fleet of mobile construction equipment in Tanzania. This compliments the Company's multi- domestic growth strategy which focuses on its operating hubs in Eastern African countries.

East Trading's heavy earthmoving equipment, skilled operatives and expertise in the work and Local environment have enabled the company to be involved in many important civil and construction projects in Tanzania. The company strive to provide the best solution to its clients, it has the depth of resources and skilled labour teams to take projects from concepts through construction, recognizing suggestions about improvements leading to that success. East trading and manufacturing company and its main group Petic Global having already completed more than 77 projects of various sizes for private and public sectors worldwide. The company and its main group operations are sweetly poised to take this commendable journey to its next level.

The capability in construction and the range of construction services offered by the group includes:

- Design and Construction Engineering
- Design-Build Projects
- Construction and Project Management
- Procurement of Materials and Equipments
- Manpower Supply and Personnel Services
- Facilities maintenance
- Concrete Repair and Water Proofing

OUR ACTIVITIES

2- ROADS CONSTRUCTION

East Trading & Manufacturing Company has worked hard to maintain its reputation in the construction quality of asphalt road and highways; it has successfully completed a range of large-Scale road projects from large highways, to small commercial site developments, the company approaches every project with dedicated efficiency, technology, and specially focused on the safety.

The Company performs all phases of road constructions, including earthwork, utilities, drainage, concrete and asphalt, paving, bridges construction, as well as aggregate productions.

What makes the company special is not just its versatility, as the fact, the company undertook many public and private sectors projects, worth of multi-million dollar, enabling the group to operate with honesty, integrity and higher standards.

OUR SPECIALTIES

why you should choose us

The benefit of working with our company

PETIC GLOBAL holds a portfolio of strategic investment in construction equipment; property and a substantial fleet of mobile plant in Saudi Arabia. This compliments the Company's multi-domestic growth strategy which centers on its operating hubs Al-Khobar, Jubail, and QATAR.

A PROJECTS

The PETIC GLOBAL philosophy can be put into one simple formula - can do! That is a promise we have been fulfilling over and over and that will remain the highest factor guiding our actions in future. We continually strive to improve our performance and to

B MISSION

Oil-rigs or refineries, power stations or steel mills, piping, mechanical, construction whatever the project, we can develop our involvement in those areas which allow our clients to take a back seat. Why? Because they know that everything which is or could be important

C THINK

Only if you plan with a good degree of foresight can serious mistakes be avoided. Foresight is a given at PETIC GLOBAL.

RELIABILITY

Systematically achieving the optimum: it is not without reason that PETIC GLOBAL is one of the companies that are able to document their competence in black and white for the benefit of our customers. Our strategies, structure and systems have been focused on creating constant customer satisfaction by delivering our customers with the services, solutions and products that are qualitative and cost effective

ASSET INTEGRITY

One of the major challenges facing the oil and gas industry today is to ensure the safe operation of their ageing assets. Asset Integrity entails making sure an asset can perform its required function effectively and safely. Mega Asset Integrity has a well trained and experienced team who certified to API (510,570,580,653),CSWIP Welding & Painting, NACE and ASNT-UT, RT,MT,PT, VT. In Addition to: Specialized Tools & Equipment.

Mega is accredited by the Egyptian Accreditation Council (EGAC) the ISO/IEC17020: Certificate for Type C Inspection Body in the field of in-service inspection.

SPECIAL SERVICES

Mega has its dedicated team for special service activities. Team members are multi-disciplined engineers and technicians with hands-on experience in this field, they are familiar with all safety procedures and can easily adopt to different customers HSE regulations. The team is well equipped and it is also highly mobile and can be mobilized on short

OUR PROJECTS

Khursaniyah Gas Plant includes two gas-conditioning trains, ethane and natural gas liquids recovery units process 1000 MMSCFD of natural gas, produce 550 MMSCFD sales gas, 240,000 BL Dethane / Natural gas liquids, and 1,800 metric tons / day sulfur.

MATERIAL SUPPLY SERVICES

PI TEC GLOBAL is a well-resourced and full-service oilfield supply company serving the Oil & Gas Industry in the country. Our clients include major Oil and Gas Companies, Projects and Contractors in Yemen. Our company has associations with renowned manufacturers, major mills and suppliers across the World.

PI TEC GLOBAL is an oilfield supplier you can trust for any urgent and important Oil & Gas project supply. Operations are conducted from purpose-built facilities in Yemen, comprising of offices, workshops, warehousing and covered storage areas, and from where a wide range of products and services covering a large spectrum of the energy industry are supplied. Products range from materials required for the drilling of wells to equipment required for large downstream projects.

PI TEC GLOBAL Stocks and Supplies are committed to client satisfaction in every aspect of our business. Guided by our core values of integrity, teamwork,

MANPOWER CONSULTANCY

Our personnel are our true and most valuable asset, motivated workforce is our passport to success. We succeeded to gain the trust of our clients and managed to expand our database of specialized and professional staff of all disciplines including Nationals & Expatriates to fulfill client needs. The experienced and high qualified personnel are one of the main assets and means to fulfill our client requests.

MAINTENANCE SERVICES:

PI TEC GLOBAL with Association with Major international companies provides scalable, integrated maintenance resources and services during a facility's lifecycle in any location in Yemen.

We offer a wide range of global maintenance services. For optimal flexibility, we offer integrated maintenance solutions to fit your individual requirements. We work with you to develop a commercial model to accomplish your business goals.

Our first priority is always safety. At every level of our organization, our HSE Management system provides us with a dynamic platform for delivering continuous improvement in our safety performance. This is backed up by a combination of dedicated services, in-depth technical excellence, and a passion for unraveling complexity that makes us your ONE partner for life.

OFFSHORE MAINTENANCE

Recognizing the strategic significance of obtaining a share of the offshore business, Mega has been successful in penetrating this market goal driven by the experienced human resources for this service.

REHABILITATION & MAINTENANCE ACTIVITIES FOR OFFSHORE OFFSHORE ASSET ASSURANCE MANAGEMENT SOLUTION PLATFORMS:

- CLEANING, BLASTING AND PAINTING FOR PLATFORMS STRUCTURE & DECKS.
- SUPPLY, FABRICATE & INSTALL THE SAFETY NET, LADDERS, HANDRAILS, ETC...
- SUPPLY, FABRICATE, & INSTALL FOR BOAT LANDING, BARGE PUMPER, RUBBER FENDER & RISER GUARD.
- SUPPLY, FABRICATE & INSTALL FIRE FIGHTING NETWORK ON PLATFORMS.
- MODIFY, FABRICATE & INSTALL NEW DECK EXTENSIONS.
- SUPPLY AND INSTALL OF NAVIGATION SYSTEM.
- FLUSHING, CLEANING AND TIGHTENING SERVICES.

IMR PROGRAM "INSPECTION, MAINTENANCE, REPAIR" & SURVEY ACTIVITIES: INSPECTION & SURVEY:

- PIPELINE INSPECTION (UT, GVI, CVI, CPM. PIPELINE ASSESSMENT).
- INTERNAL PIPELINE INSPECTION BY TETHERED TOOL .. WELD & PIPE SCAN.
- NOT INSPECTION FOR VERTICAL STRUCTURES & RISERS.
- ROV INSPECTION SERVICES.
- INSPECT PAINTING CONDITION.
- PIPELINE SURVEY (SIDE SCAN, PIPE TRACKER, SUB BOTTOM PROFILER).
- GEOPHYSICAL & GEOTECHNICAL SURVEY.
- ASSISTANT IN JACK UP MOORING AND POSITIONING.

REPAIR & MAINTENANCE:

- NEAR SHORE PIPE LINE REPLACEMENT | REPAIR.
- INSTALLING FREE SPAN SUPPORTS UNDER PIPE LINES.
- DEBRIS REMOVAL.
- INSTALLING CLAMPS & ANODES FOR STEEL STRUCTURE & PIPELINES.
- SPLASH ZONE COATING REPAIR & MAINTENANCE.
- BLASTING AND PAINTING FOR TANKS (INSIDE & OUTSIDE).
- CUTTING & WELDING UFW.
- DECOMMISSIONING OF MONOPOD, TRIPOD, ETC...
- SUBMARINE CABLE ROOT SURVEY & LAYING.

OFFSHORE MAINTENANCE & INSPECTION ACTIVITIES FOR MOORING BUOY:

- GENERAL VISUAL INSPECTION & VIDEO SURVEY TO IDENTIFY ANY DAMAGES, CORROSION OR DENTS FOR ALL SUBSEA COMPONENTS.
- UT WALL THICKNESS MEASUREMENT.
- INSPECT PHYSICAL STATUS OF CATHODIC PROTECTION (DEPLETION, FIXATION, REMAINING EFFECTIVE).

ONSHORE MAINTENANCE

We provide an integrated maintenance service (Global Maintenance), utilizing the latest maintenance techniques and best practice to cover the complete package of our client's facilities such as equipment, tools, buildings, etc... through long term contracts controlled by Pre-set KPI's (availability, reliability, HSE, etc...) to ensure the optimum performance of maintenance implementation.

THE TEAM CAPABILITIES & QUALIFICATIONS

WELL TRAINED AND CERTIFIED MAINTENANCE TEAMS WHO HAVE GAINED THEVARIOUS MAINTENANCE TECHNOLOGIES BY DEALING | HANDLING ADIVERSITY OF PROCESS TYPES OIL,GAS,LNG, ETC... WITHITS RELATED OPERATION TECHNIQUES AND SAFETY HAZARDS INSIDE ANDOUTSIDE OIL& GAS SECTOR FOR RAILWAYS, INDUSTRIAL SECTOR,ETC...

ONSHORE SERVICE SCOPE

- Maintenance Engineering.
- Maintenance Planning (CMMS) &Implementation.
- Execution of Maintenance Programs (Corrective, Preventive & Predict ve) for Electrical,Instrument, Mechanical,Stat c Equipment
- Major Equipment Overhauling & Tum-around.
- Executionof Upgrading, Expansion & Modification to existing Facilit es.
- MaterialManagement & Stook Control.

Testing, pre-commissioning and assistance of commissioning.

Having already completed a decade in the construction business, we PITEC GLOBAL had the opportunity to work on a diverse range of projects in the past. Handling these projects have immensely helped us in collecting a high degree of expertise on the various aspects of this business, and today, we can boast of handling an umbrella range of services for our clients.

We provides Services for the following:

Production operations & maintenanc

Mechanical, instrumentation & electrical modification

HSE & emergency managemen

ELECTRICAL, INSTRUMENTATION & COMMUNICATION

Mega has built a specialized and highly competitive Electric, Instrumentation & Communication Team providing Construction, Maintenance and Modification Activities inside and outside the Oil and Gas Sector.

Mega has gained an enviable reputation through innovative solutions, quality services, competitive prices and reliable and timely completed projects.

STATIC EQUIPMENT REHABILITATION

Mega has a significant market share as a unique service provider for Boilers & Heaters Revamping, Separators Fabrication & Heat Exchanger in oil & gas fields for water/fire tube boiler revamping, supported by a specialized workshop specifically for such kind of services complying with ASME Code.

CHEMICAL CLEANING

Mega applies an advanced methodology by flowing cleaning chemicals circulated in a closed loop to ensure no leak or Contamination to the surroundings. Additionally, the chemicals used are non-toxic, non-flammable, non corrosive & environment friendly that dissolve and remove the deposits only, and have no effect whatsoever on the substrate of the equipment, thus it is considered the appropriate safe choice to project the integrity and safety of the assets.

EARLY PRODUCTION

Early production facilities and fast-track product on systems enable Mega's clients to create early cash flow with minimum cash outlay. They also provide real-time product data that enables our clients to appraise reservoir performance before installing permanent facilities.

HOT TAPPING

Hot tapping or pressure tapping, is the method of making a connection to existing piping or pressure vessels without the interruption of emptying that section of pipe or vessel. This means that a pipe or tank can continue to be in operation whilst maintenance is being done to it. The process is also used to drain off pressurized casing fluids.

TUBE BUNDLE PULLER MACHINE

New sophisticated equipment specialized in handling the tube bundles of heat exchangers. The machine is 3rd unit in Egypt and 1st among specialized maintenance companies. The puller is a pioneer in its capacity as it is designed to handle heat exchangers Bundles up to 12 meter long, 2 meter diameter and weight up to 35 ton.

SCAFFOLDING, PAINTING & INSULATION (SPI)

Mega has its dedicated team for Scaffolding, Painting & Insulation. Team Members are multi-disciplined certified engineers and technicians with hands-on experience. They are familiar with all safety procedures and can easily adopt to different customers HSE regulations. The Team is well equipped with all necessary tools, and could be mobilized on a short notice to any location.

SCAFFOLDING

Mega have their own suspended mobile scaffolding system, modified by Mega to be matched with the international HSE regulation and certification requirements to carry out all scaffolding types following own scaffolding procedures which based on the international specifications (BS, OSHA, EN). Mega has standard scaffolding material tested, inspected and matching with the international standards. All manpower are well selected, trained, highly qualified and certified, in addition to internationally certified scaffolding inspectors (CITS).

PAINTING

Mega painting team, are capable to deal with all type of painting material, painting procedures and follow up the most specific specification for new construction or maintenance especially in refineries. Painting equipment is owned by Mega, of a high standard and subjected to a very strict maintenance program to keep the availability and reliability in the highest level and matched with life plants requirements tested and certified. Mega selective manpower are well trained, and highly qualified, specially painting engineers • inspectors •

INSULATION

Mega team have their own mobile workShops, including all required fabrication tools, machine and equipment. Mega manpower is very selective, high experience, competent, trained and highly qualified. Mega insulation team is updated with the latest international specifications system and they are capable to deal with any international standards and procedure. Mega insulation team is capable to carry out any volume of work during SID, normal maintenance or new construction.

EPC (ENGINEERING - PROCUREMENT - CONSTRUCTION)

Mega along with its partner Aibel, in addition to our new fabrication certified WISH in Suez City, have the track record and systems necessary to pursue and deliver large-scale and complex projects. Mega is one of the most capable companies with the resources, technical capabilities and systems to meet the demands of large scale projects for both onshore & offshore applications.

CIVIL WORKS AND CONSTRUCTION

PITEC GLOBAL'S heavy earthmoving equipment, skilled operatives and expertise in the work and Local work environment have enabled the company to be involved in many of the important civil and construction projects in Yemen.

We strive to provide the best solution to clients. We have the depth of resources and skilled labor teams to take your project from concept through construction, recognizing suggestions about improvements for the success of projects. Having already completed more than 77 projects of various sizes for private sector as well as government projects, PITEC GLOBAL business operations are sweetly poised to take this commendable journey to its next level.

The capabilities in construction and the range of construction services offered PITEC GLOBAL include:

Fabrication and installation of piping, steel structures and equipment

ROADS CONSTRUCTION

PITEC GLOBAL has worked hard to maintain exceptional reputation for constructing quality asphalt roads and Highways; we have successfully completed a range of large-scale road projects from large highways, to small commercial site development, we approach every project with a dedication to efficiency, technology, and most of all safety.

We perform all phases of road construction to include earth work, utilities, drainage, concrete and asphalt paving, bridge construction, as well as aggregate production.

As a heavy/highway contractor, we have an experienced workforce and maintain a large fleet of equipment to complete a wide variety of projects. We strive to provide an excellent product in all areas.

What makes PITEC GLOBAL special is not just our versatility, or the fact that the public companies and private sectors have trusted us with multi-million dollar projects; it is that we guide our business with honesty, integrity, and the finest work standards in mind.

PITEC GLOBAL has over 10 years of experience with road construction, road repairs, concrete construction and paving. Services from road repairs to complete road construction it doesn't matter if you need to simply pave a private road or are planning the next major highway construction.

PITEC GLOBAL Road is ready to serve.

PRE-COMMISSIONING

-site and are responsible for implementing the pre-commissioning activities as per plan and ensuring their disciplined documentation requirements are fulfilled.

PRE-COMMISSIONING

A main part of activities is undertaking turnkey commissioning projects, or partial contribution with other contractors as per the Client requirements.

Whatever the case, we have the technology, our own quality software CTS (Commissioning Tracking System) and the experience to

SHUTDOWN SERVICE

Mega has its dedicated shutdown team that masters the unique and specific nature of shutdown and turnaround activities, this leads to reducing the preparation time, collecting historical information, retaining this information for future reference and optimizing the resources utilization.

RWANDA INVESTMENT

Almaha For Industry Co LTD
 Bougesera Industrial Park.
 City: Bougesera
 Rwanda

The next investment of the group of Sheikh Salah was Rwanda, the group decided to invest in home appliance and pharmaceutical products manufacturing, the manufacturing sector in Rwanda grew by 8% for the fiscal year 2017/2018(Source: NISR Annual Economic Report. January 2019). The sector is still small but it has been steadily growing, to attract foreign investment, Rwanda government has created special zones and 9 industrial parks. So far, the group has invested in the area of Bougesera which is one of industrial Parks located in the east district of Rwanda.

For market access, Rwanda has access to African and global markets through robust free trade agreements, namely:

- Common Market for Eastern and Southern Africa (COMESA) with a market of 492M
- East African Community (EAC)with a market of over185M
- Tripartite Free Trade Area Agreement (COMESA EAC SADC) with a market of 600M
- Continental Free Trade Agreement (CFTA)
- Cotonou Agreement established with the EU through Everything but Arms (EBA) and conclusion of EPA
- World Trade Organization (WTO) Declarations.

The group investment concentrated in two main areas:

1- Home appliances:

The Factory is well situated in Bougesera, the manufactured goods can be transported to many neighbouring countries in East Africa. The factory started manufacturing Fridges, Cookers, Refrigerators and display fridges for shops, aiming to manufacture more house wear products in view to satisfy the need of East Africa region.
